TARIFF FORMAT

- A. Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th Revised Page 14 cancels the 3rd Revised Page 14. Because of various suspension periods, deferrals, etc., the most current page number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the page currently in effect.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).I.
 - 2.1.1.A.1.(a).I(i).
 - 2.1.1.A.1.(a).I(i).(1).
- D. Check Sheets** - When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the pages contained in the tariff, with a cross-reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages). The tariff user should refer to the latest Check Sheet to find out if a particular page is the most current on file with the Commission.

SECTION 3 - DESCRIPTION OF SERVICE AND MAXIMUM RATES. (CONT'D.)**3.4 Calculation of Distance**

Usage charges for all mileage sensitive products are based on the airline distance between the serving wire center locations associated with the originating and terminating points of the call. The distance between the originating and terminating points is calculated by using the "V" and "H" coordinates of the serving wire centers as defined by BellCore (Bell Communications Research), in the following manner:

Step 1 -Obtain the "V" and "H" coordinates for the Subscriber's switch and the destination point.

Step 2 -Obtain the difference between the "V" coordinates of each of the Serving Wire Centers. Obtain the difference between the "H" coordinates.

Step 3 -Square the difference obtained in Step 2.

Step 4 -Add the squares of the "V" difference and "H" difference obtained in Step 3.

Step 5 -Divide the sum of the squares obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.

Step 6 -Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the Serving Wire Centers.

Formula:

$$\sqrt{\frac{(V_1 V_2)^2 + (H_1 H_2)^2}{10}}$$

SECTION 3 - DESCRIPTION OF SERVICE AND MAXIMUM RATES. (CONT'D.)**3.5 Institutional Operator Assisted Service****3.5.1 Description**

Institutional operator assisted service allows Inmates to place Collect Calls through an automated call processing system. The call processing system prompts the Inmate and the called party such that the call is completed without live operator assistance. Calls are placed on a collect-only basis to the called party.

A number of special blocking and screening capabilities are available with institutional operator services provided by DSI. These capabilities allow Institutions to control Inmate access to telecommunications services, reduce fraudulent use of the Company's services, and eliminate harassing calls to persons outside the Institution.

For services provided to Inmates of Institutions, the following special conditions apply:

- a. Calls to "900", "976" or other pay-per-call services are blocked by DSI.

- g. At the request of the Institution, CTI may impose time limits on local and long distance calls placed using its services.
- h. At the request of the Institution, equipment may be provided which permits monitoring of inmate calls by legally authorized government officials.

SECTION 3 - DESCRIPTION OF SERVICE AND MAXIMUM RATES. (CONT'D.)**3.6 Prepaid Collect Service****3.6.1 Description**

Prepaid Collect Service allows recipients of collect calls from inmate facilities to set up a prepaid account with the Company from which such calls are decremented. Inmates place a collect call through the standard dialing pattern to a specific telephone number (station to station). The Subscriber accepts the collect call and the charges for that call are deducted from the Subscriber's Prepaid Account. Funds in this Prepaid Account may only be used for payment of calls received by Subscribers to their telephone number specified to the Company when the Prepaid Account is established.

Prepaid Collect Service calls are not distance sensitive. Call timing is rounded up to the nearest one (1) minute increment after the initial minimum period of one (1) minute and therefore the Available Usage Balance is decremented in full minute increments.

Per call and usage for each call placed is deducted from the Available Usage Balance in the Inmate's Prepaid Account. Customers may obtain the current Available Usage Balance, last payment made and last payment date by calling the Company's Customer Service toll free number twenty-four (24) hours a day, seven (7) days a week.

SECTION 3 - DESCRIPTION OF SERVICE AND MAXIMUM RATES. (CONT'D.)**3.7 Institutional Prepaid Service****3.7.1 Description**

Institutional Prepaid Service allows inmates to set up prepaid accounts for outbound calling. Prepaid calls are originated when the inmate enters their unique PIN and destination number. The institution has the option of enabling a function requiring positive call acceptance on each call placed via Institutional Prepaid Service.

With the assistance of the institution, the company will set up a Prepaid Account for calls placed from the institution. Funds in the Prepaid Account may only be used for payment of calls placed by inmates. The Company's system informs the inmate of the Available Usage Balance remaining in the Prepaid Account upon access to place a call, and prompts the inmate Customer to place a call by entering the destination telephone number.

Institutional Prepaid Service calls are not distance sensitive. Call timing is rounded up to the nearest one (1) minute increment after the initial minimum period of one (1) minute and therefore the Available Usage Balance is decremented in full minute increments. Per call and usage for each call placed is deducted from the Available Usage Balance in the Inmate's Prepaid Account on a real time basis as the call progresses.

SECTION 3 - DESCRIPTION OF SERVICE AND MAXIMUM RATES. (CONT'D.)**3.8 Miscellaneous Rates and Charges****3.8.1 Public Telephone Surcharge**

In order to recover the Company's expenses to comply with the FCC's pay telephone compensation plan effective on October 7, 1997 (FCC 97-371), an undiscountable per call charge is applicable to all interstate, intrastate and international calls that originate from any domestic pay telephone used to access the Company's services. This surcharge, which is in addition to standard tariffed usage charges and any applicable service charges and surcharges associated with the Company's service, applies for the use of the instrument used to access the Company service and is unrelated to the Company's service accessed from the pay telephone.

Pay telephones include coin-operated and coinless phones owned by local telephone companies, independent companies and other interexchange carriers. The Public Pay Telephone Surcharge applies to the initial completed call and any reoriginated call (i.e., using the "#" symbol).

Whenever possible, the Public Telephone Surcharge will appear on the same invoice containing the usage charges for the surcharged call. In cases where proper pay telephone coding digits are not transmitted to the Company prior to completion of a call, the Public Pay Telephone Surcharge may be billed on a subsequent invoice after the Company has obtained information from a carrier that the originating station is an eligible pay telephone.

The Public Telephone Surcharge does not apply to calls placed from pay telephones at which the Customer pays for service by inserting coins during the progress of the call.

The Public Telephone Surcharge does not apply where the Company is otherwise compensated.
